

## Guidelines for project documentation

This document describes which content (besides prototypes) we expect you to deliver for this year's PIDA. We have also added an example of a One-Pager by using last year's winner "RESPICE" to see the format that we expect.

The documentation should be in English.

## Presentation

The presentations for PIDA 2022 will be in the same digital format as last year. They are used several times during the evaluation and a good format for understanding the project. The format for the presentation is to be a slideshow with a voiceover. The language used in the presentation is English, both in slides and voiceover. Please see the guideline reference video.

### Key points for the presentation

- Presentation length is set to maximum 3 minutes. This counts for the presentation + the project film clip/promo video that is to be added at the end (added by students before applying)
- Start the presentation with a group picture of team members and the project name
- Use 16:9 format
- Make sure to use royalty free material in your production, music + pictures

Use guideline video as reference: <https://youtu.be/wSyAIN0CCik>

## One-Pager

### Project Name

Name of the project

### Name of the University/School

Team members (Name + email)

### Concept Description

Start with a concept description that explains your package and the "It's a wild life" connection. Build your story by trying to answer these questions; Who did you develop your package for and why? Where are you going to sell the product? What is special about this packaging experience? What are the benefits with your package?

### Sustainability

Does your packaging concept challenge the conventional? In what way and why is that important for you?

## **Packaging Design**

Explain your structural design and the intended use.

If you have a smart solution (opening, closing, insert, tamper-proof etc.) give us an explanation on how to use it. Any ideas about folding, gluing, printing, filling?

Which material/s and why have you chosen it for your package?

## **Graphical Design**

Describe the graphical design and the logo of your brand.

## **Drawing**

If it fits on this page, add the drawing of your package. If not add it on the next page.

## **Attachments**

Add as many pictures you would like in the following pages but remember that you in addition to your prototype also have the film and the PowerPoint presentation to build your case.

## **Film**

Maximum length 90 seconds, preferably 60 seconds

File format: \*.mp4, \*.mov, \*.avi, \*.wmv

The films can preferably be filmed by using your mobile phone and for example end-text added in a free editor software. Keep the size down to a maximum of 150 MB. Please feel free to be creative!

For film inspiration have a look in our Gallery at: [www.billerudkorsnas.com/pida](http://www.billerudkorsnas.com/pida)

Film (max. 90 seconds long). **Note: Most music and pictures are copyrighted, and must not be used without permission. Make sure to secure user rights before including protected content in your application material.**
